PROFESSIONAL SUMMARY

Motivated Software Developer with strong foundational expertise in Python, RESTful API engineering, and relational database management. Ex

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, HTML5, CSS3, SQL
- Frameworks & Libraries: Flask, Jinja2, SQLAlchemy, jQuery
- Databases: PostgreSQL, SQLite, MySQL
- Development Tools: Git, GitHub, Postman, VS Code, Linux/Bash
- Methodologies: Agile/Scrum, RESTful Architecture, Unit Testing (unittest, pytest)

KEY PROJECTS

1. Campus Market - API-Based Web Application (Python, Flask, PostgreSQL)

- Designed and built a modular REST API backend using Python and Flask supporting user authentication, product listings, and order workflows
- Implemented relational database schemas in PostgreSQL with indexed foreign keys, handling over 2,500 test transactions with sub-100ms res
- Integrated JWT-based stateless session management and input validation with comprehensive unit tests achieving 85% code coverage.
- Created responsive frontend views using HTML5, CSS3, and JavaScript fetch API.

2. Automated Event Notification Service (Python, REST APIs, SQLite)

- Engineered a lightweight asynchronous polling micro-service that consumes external third-party REST APIs and dispatches webhook alerts.
- Optimized SQL queries and database indexes, reducing disk read latency by 35%.
- Implemented structured logging, error-handling middleware, and automated payload parsing.

3. College Academic Portal (Python, Flask, HTML/CSS)

- Developed a student grade tracking and schedule planner used by 300+ university peers.
- Built clean, responsive interfaces with custom CSS and modular Jinja2 templates.
- Utilized Git for version control and pull request reviews following PEP8 standards.

WORK EXPERIENCE

Software Engineering Intern | Peak Technologies

June 2024 – September 2024

- Collaborated with senior engineers to implement and test backend REST endpoints in Python.
- Wrote automated test suites in pytest, identifying and resolving 18 edge-case bugs prior to production release.
- Participated in weekly sprint reviews, code refactoring sessions, and technical documentation.

EDUCATION

Bachelor of Science in Computer Science

State University of Technology | Graduated: May 2025

- GPA: 3.8 / 4.0

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Development, Software Engineering Principles, C
